

## *Advances In Adaptive Computational Methods In Mechanics*

### **Advances In Adaptive Computational Methods**

The series "Advances in Intelligent Systems and Computing" contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural ...

### **Advances in Intelligent Systems and Computing**

Computational electromagnetics, computational electrodynamics or electromagnetic modeling is the process of modeling the interaction of electromagnetic fields with physical objects and the environment.. It typically involves using computationally efficient approximations to Maxwell's equations and is used to calculate antenna performance, electromagnetic compatibility, radar cross section and ...

1. Introduction. Artificial neural networks (ANNs) constitute the core information processing technology in the fields of artificial intelligence and machine learning, which have witnessed remarkable progress in recent years, and they are expected to be increasingly employed in real-world applications (Samarasinghe, 2016). ANNs are computational models that mimic biological neural networks.

Neuroethology is the evolutionary and comparative approach to the study of animal behavior and its underlying mechanistic control by the nervous system. This interdisciplinary branch of behavioral neuroscience endeavors to understand how the central nervous system translates biologically relevant stimuli into natural behavior. For example, many bats are capable of echolocation which is used ...

Hollywood Special Effects via Computer Vision, Machine Learning, and Physical Simulation These days my work on special effects focuses quite a bit on face and body animation and simulation, trying to outwit the uncanny valley.

Aloha, I'm the chief scientist at Salesforce. Previously, I was an adjunct professor at Stanford's computer science department and the founder and CEO/CTO of MetaMind which was acquired by Salesforce in 2016. I enjoy improving the state of the art in AI through research (deep learning, natural language processing and computer vision) and making AI easily accessible to everyone.

where  $R_{ij}$  is a local neighbourhood around location  $(i, j)$ . The typical pooling operations are average pooling and max pooling . Fig. 2(b) shows the feature maps of digit 7 learned by the first two convolutional layers. The kernels in the 1st convolutional layer are designed to detect low-level features such as edges and curves, while the kernels in higher layers are learned to encode more ...

IBM Research has been exploring artificial intelligence and machine learning technologies and techniques for decades. We believe AI will transform the world in dramatic ways in the coming years – and we're advancing the field through our portfolio of research focused on three areas: towards human-level intelligence, platform for business, and hardware and the physics of AI.

The First International Nonlinear Dynamics Conference will be held at Sapienza University of Rome, February 17-20, 2019. NODYCON intends to foster the tradition of an illustrious conference series that was originally launched by Prof. A. H. Nayfeh in 1986 at Virginia Tech as the Nonlinear Vibrations, Stability and Dynamics of Structures Conference.
