

Business Process Modeling Standards

Business Process Modeling Standards

Business process modeling (BPM) in business process management and systems engineering is the activity of representing processes of an enterprise, so that the current process may be analysed, improved, and automated. BPM is typically performed by business analysts, who provide expertise in the modeling discipline; by subject matter experts, who have specialized knowledge of the processes being ...

Business process modeling - Wikipedia

Providing the most accurate and up to date information about BPMN 2.0 - BPMN.org is your official BPMN resource for Business Process Model and Notation.

BPMN Specification - Business Process Model and Notation

Overview. Business Process Model and Notation (BPMN) is a standard for business process modeling that provides a graphical notation for specifying business processes in a Business Process Diagram (BPD), based on a flowcharting technique very similar to activity diagrams from Unified Modeling Language (UML). The objective of BPMN is to support business process management, for both technical ...
