Conduct Disorders In Childhood And

Conduct disorder (CD) is a mental disorder diagnosed in childhood or adolescence that presents itself through a repetitive and persistent pattern of behavior in which the basic rights of others or major age-appropriate norms are violated. These behaviors are often referred to as "antisocial behaviors." It is often seen as the precursor to antisocial personality disorder, which is per definition ...

Conduct disorder - Wikipedia

Mental disorders diagnosed in childhood are divided into two categories: childhood disorders and learning disorders. These disorders are usually first diagnosed in infancy, childhood, or adolescence, as laid out in the DSM-IV-TR and in the ICD-10. The DSM-IV-TR includes ten subcategories of disorders including mental retardation, Learning Disorders, Motor Skills Disorders, Communication ...
