2. ZPL Extensions for Simulating Colored Label Stock. You can simulate colored (or partially colored) label stock by using the non-standard ~BR ("background rectangle") and ~BI ("background image")

commands.. These commands are ignored by physical printers, but Labelary will interpret them as requests to draw colored rectangles and images, respectively.

Labelary Engine Documentation

When the Rolling Stones signed to CBS, and released albums beginning with Dirty Work in 1986, the entire album label would be unique to that title. Even the highly recognizable Tongue & Lip design would be altered for the Steel Wheels release of 1989 - the first, but not the last, time that was done. (1994-2005) Virgin hasn't bothered to press US versions of the Stones more recent LPs,
