The National Alliance on Mental Illness defines evidence-based practices, also known as EBPs, as treatments that have been researched academically or scientifically, been proven effective, and replicated by more than one investigation or study. This model integrates medically researched evidence with individual patient values and the clinical experience of the provider.

Collaborative therapy is a therapy developed by Harlene Anderson, along with Harold A. Goolishian (1924-1991), in the USA. It is intended for clients who are well educated in any field, or for those that have distrust of psychotherapists due to past negative experiences with one or more.

Collaborative therapy - Wikipedia

Dual diagnosis (also called co-occurring disorders, COD, or dual pathology) is the condition of suffering from a mental illness and a comorbid substance abuse problem. There is considerable debate surrounding the appropriateness of using a single category for a heterogeneous group of individuals with complex needs and a varied range of problems. The concept can be used broadly, for example ...

Pursuant to the recent vote on revised by-laws and subject to final sign-off from AAMFT, VAMFT is no longer a division of AAMFT. This outcome is the result of the change in AAMFT by-laws that required some change in the various divisions, removing the historic dual membership requirement, i.e., members were required to join both the national association AND their respective division.
