IEEE 802.11 is part of the IEEE 802 set of LAN protocols, and specifies the set of media access control (MAC) and physical layer (PHY) protocols for implementing wireless local area network (WLAN) Wi-Fi computer communication in various frequencies, including but not limited to 2.4, 5, and 60 GHz frequency bands.. They are the world's most widely used wireless computer networking standards ...

EURASIP Journal on Wireless Communications and Networking is a peer-reviewed open access journal published under the brand SpringerOpen. The overall aim of the EURASIP Journal on Wireless Communications and Networking is to bring together science and applications of wireless communications and networking technologies with emphasis on signal processing techniques and tools.

IEEE 802 is a family of IEEE standards dealing with local area networks and metropolitan area networks.. More specifically, the IEEE 802 standards are restricted to networks carrying variable-size packets. By contrast, in cell relay networks data is transmitted in short, uniformly sized units called cells. Isochronous networks, where data is transmitted as a steady stream of octets, or groups ...
