### **Latitude & Longitude Lesson Plan | Study.com**

-- Latitude and longitude are angles. What units are used to measure angles? Degrees, "minutes of arc" and "seconds of arc" (we add "of arc" only where we want to be sure these terms are not confused with units of time).. A right angle contains 90 degrees, written 90°. (The angles formed by several lines meeting at a point all add up to 360°)
