### **Logical Positivism Philosophy Of Education**

Logical positivism and logical empiricism, which together formed neopositivism, was a movement in Western philosophy whose central thesis was verificationism, a theory of knowledge which asserted that only statements verifiable through empirical observation are meaningful. The movement flourished in the 1920s and 1930s in several European centers. ...

In the early 20th century, logical positivism—a descendant of Comte's basic thesis but an independent movement—sprang up in Vienna and grew to become one of the dominant schools in Anglo-American philosophy and the analytic tradition. Logical positivists (or 'neopositivists') rejected metaphysical speculation and attempted to reduce statements and propositions to pure logic.

Positivism is the belief that human knowledge is produced by the scientific interpretation of observational data.. The approach has been an ongoing "theme in the history of western thought from the Ancient Greeks to the present day". The term was used in the early 19th century by the philosopher and founding sociologist, Auguste Comte.. Comte, a sociologist, believed in a three part model of ...

Western philosophy - Contemporary philosophy: Despite the tradition of philosophical professionalism established during the Enlightenment by Wolff and Kant, philosophy in the 19th century was still created largely outside the universities. Comte, Mill, Marx, Kierkegaard, and Schopenhauer were not professors, and only the German idealist school was rooted in academic life.
