Of B S Grewal Maths

A vector describes a movement from one point to another. It is a mathematical quantity having both Magnitude & Direction. The length of the segment of the directed line is called the magnitude of the vector and the angle at which the vector is inclined shows the direction of the vector.

Vectors in Maths - Byju's Mathematics

Select any topic from the above list and get all the required help with math formula in detail. It contains a list of basic math formulas commonly used when doing basic math computation. Math formula shows how things work out with the help of some equations like the equation for force or acceleration. Eventually, formulas are used to provide mathematical solution for real world problems.
