The steps and timing of human folliculogenesis are shown in Fig. 2. In women, folliculogenesis is a long process. 1,2,3 In each menstrual cycle, the dominant follicle that ovulates its egg originates from a primordial follicle that was recruited to initiate growth almost 1 year earlier (Fig. 2). In a broad sense, there are two types of follicles (Fig. 2): preantral (primordial, primary ...
